

What is claimed is:

1. A telephone answering device, comprising:

5 (a) voice message recording means for recording
messages from callers calling said answering
device;

10 (b) Caller ID data recording means for recording
Caller ID data from the callers calling said
device; and

15 (c) interface means for transmitting the recorded
Caller ID data when the recorded messages are
retrieved.

2. A telephone answering device according to claim 1
wherein said interface means is adapted to transmit the
20 recorded Caller ID data to a Caller ID device coupled to a
telephone used to retrieve the recorded messages.

25 3. A telephone answering device according to claim 1
wherein said interface means is adapted to transmit the
recorded Caller ID data to an apparatus in a call control
system.

4. Apparatus as set forth in claim 3 wherein said call control system is a PBX.

5

5. Apparatus as set forth in claim 3 wherein said call control system is a ToL Gatekeeper.

10

6. Apparatus as set forth in claim 3 wherein said call control system is a wireless carrier system.

15 7. Apparatus as set forth in claim 3 wherein said call control system is a central office.

20 8. A telephone message storage and remote retrieval system, comprising:

- (a) voice message recording means for recording messages from callers calling said telephone message storage and remote retrieval system;

25

(b) Caller ID data recording means for recording
Caller ID data from the callers calling said
system;

5 (c) interface means for transmitting the recorded
Caller ID data when the recorded messages are
retrieved; and

(d) a call control system for receiving the
10 transmitted Caller ID data.

9. A system according to claim 8 wherein said call control
system includes Caller ID storage and retrieval means for
15 causing a number corresponding to received Caller ID data to
be called by said call control system.

10. Apparatus as set forth in claim 8 wherein said call
20 control system is a PBX.

11. Apparatus as set forth in claim 8 wherein said call
control system is a ToL Gatekeeper.

12. Apparatus as set forth in claim 8 wherein said call control system is a wireless carrier system.

5 13. Apparatus as set forth in claim 8 wherein said call control system is a central office.
